

Volunteering in the Events

Project Background:

There is an ongoing skill-based requirement in areas related to digital posters, social media creatives, animated videos, designing flyers, and creating training nuggets that can be used to simplistically explain concepts to our in-house trainers (especially from Outreach and TnQ departments). Volunteers can take on projects as per their expertise—where we give them a problem statement, and they deliver a solution.

Under the banner of skill-based projects, we pick up quarterly projects with specific deliverables and offer them to volunteers during orientation.
